

NC3000 Series

10 MHz to 67 GHz

Calibrated Coaxial AWGN Noise Sources

Noisecom's NC 3000 Series calibrated AWGN noise sources embody excellent stability with temperature and voltage. They are well suited for receiver testing, noise figure measurements, and any application requiring broad bandwidth and fast switching time. The NC 3000 Series includes the NC 3100 units that feature 15.5-dB \pm 0.75 dB ENR output for noise-figure meters, and the NC 3200 Series high-output noise sources that feature output between 26 and 35 dB \pm 1 dB ENR for radar and satellite communications system testing.

Like all Noisecom noise sources, the NC 3000 Series features hermetically sealed noise diodes and each noise source is supplied with calibration data for the full frequency band.

Features

- Noise output rise and fall times less than 1 μ s
